PROFESSIONAL EXPERIENCE

Web Frontend Developer

ProMarketing   06/2024 - 08/2024   **Chile**
Software development company

- Maintain the company's internal betting (casino) site, developed with React and Next.js. This site is highly scalable and adheres to SOLID code principles, with a strong emphasis on user experience (UX). The web app was optimized to be nearly a PWA due to the high percentage of mobile users. My responsibilities as a developer were to maintain continuous design updates and performance optimization, ensuring a smooth and engaging user experience.

Mobile Frontend Developer

Mobiera s.a.s   06/2021 - 01/2024   **Colombia**
Software development company

- Participate in the development of a mobile application to provide travel services, trains, hotel rentals, automobiles, applying design in Figma, Using different technologies and tools such as used, React Native | Redux | Redux-saga | Hooks | Immer | Test Unit | Jest
- Participate in the development of a mobile application, for presentation of encrypted and verifiable credentials, preserving user privacy, replicating the design in Figma using different technologies and tools such as TypeScript | React Native | Redux | Context-api | Hooks | Immer | Test Unit | Jest | React-Navigation

Web Frontend Developer

WiHermes   01/2021 - 06/2021   **Colombia**
Software development company

- I developed web modules from Figma designs, creating components and views with a strong focus on user experience (UX) and user interface (UI) design. I optimized the web application's performance using technologies like React | Redux | Formik | Context-api | firebase, Additionally, the project was structured according to Atomic Design principles.

Web Frontend Developer

Solutraffic Ingenieria S.A.S   02/2019 - 02/2021   **Colombia**
Software development company

- I participated in the development of a web application to manage the creation of the Local Road Safety Plan (PLSV) and the Strategic Road Safety Plan (PESV). This included the implementation of key modules such as Institutional Management, Human Behavior, Safe Vehicles, Safe Infrastructure, and Victim Care. I also designed views focused on the user interface (UI) and user experience (UX) to improve overall performance.

COMPETENCIES

React | React Native | JavaScript | TypeScript | Next.js | Node.js | Redux-Saga | Context-API | Tailwind-ui | Redux | Bootstrap | Jira | CSS | Material-UI | Enzyme | Jest | Formik | Recharts | Asana | React-Navigation | Leaflet | Redux-Toolkit | React-Hook-Form | Immer | HTML5 | Firebase | React-Bootstrap | UI | Git | Vite.js | Scrum Methodology | Github | Gitlab | Canvas Methodology | PWA | Apollo Client | SOLID principles | Clean Code | API Management | Atomic Design Methodology | GraphQL | React-Testing-Library

PERSONAL PROJECTS

Gaby-bluses

Responsive web application, which allows the sale and administration of products, developed with the following technologies, Next.js | Auth.js | Prisma | PostgreSQL | Docker | TypeScript | Tailwindcss | JavaScript | PayPal | Netlify (https://gaby-blouses.netlify.app/)

- Implementing the local Docker configuration to establish communication with PostgreSQL was one of my challenges.
- Implement authentication configuration with the auth.js library
- Implement PayPal configuration for payment management.

Fide-pastelitos

Web application, which allows the sale and management of cakes, developed with the following technologies, React | Firebase | Material-ui | Jest | Emotion | React-Hook | React-Router.

- Implementing the Firebase configuration, to connect the authentication and registration services with the web application, was one of my challenges (https://web-pasteleria-56444.web.app/)

LANGUAGES

Spanish Native or Bilingual Competence

English A2

CERTIFICATES

- Udemy - Learn TypeScript from 0 to 100
- Udemy - SOLID Principles and Clean Code.
- Udemy - Next.js - The framework of React for production.
- Udemy - React Native: Native applications for IOS and Android
